Motivation: History of the Concept

More modern theories construe human beings as all-just and all-knowing final judges of their actions Expectancy-value theories (eg, Atkinson 1957) assume that people choose goals in a rational way, based on the comprehensive knowledge of the probability of goal attainment and the goal's expected value It is proposed that the subjective probability of success and the incentive value of

THE PRACTICE OF HUMAN RESOURCE MANAGEMENT

Human resource management is the process through which management builds the workforce and tries to create the human performances that the organisation needs (Boxall and Purcell, 2016:7) 8 These definitions point to some of the key characteristics of HRM as identified by Armstrong (2008): • The diversity of HRM: It is difficult to identify universal characteristics of HRM Many models exist
